Requirements for GPS extracts when applying for dispensation

As of May 1, 2016, new requirements for GPS extracts related to dispensations entered into force. If the application for dispensation is to be considered valid, the attached GPS report must satisfy the following requirements:

It must:

- be a PDF file, generated by the GPS company
- must be in either Danish, English or German
- show the time of the start and stop of the report (at least 7 days prior to wash and disinfection)
- show the correct registration number
- show the vehicles' position (country code and either addresses or coordinates) for **every 30 minutes** of the vehicle's driving time (at less than 30 minutes the Report will be too long)
- show a continuous mileage counter (km.)
- show the GPS company's logo/watermark
- be no longer than **50 pages**

Furthermore, dispensations are only given if:

- the haulier *and* the exporter are both DANISH approved
- the haulier *and* the exporter are both QS approved (this is a precondition for DANISH approval) – or are underway in the QS approval procedure
- the vehicle has been set up to automatically deliver GPS data to our servers – or this setup is underway

Special further requirements to vehicles, that have been in countries with more types of zones (e.g. both black and red zones **or** both red and green zones).

- A map of the positions of the report
- Zip codes of every position
