

Increased alert - Technical annex

DANISH TRANSPORT STANDARD, November 24, 2020

To avoid outbreaks of African Swine Fever in Denmark, an increased state of alert has been introduced for vehicles arriving from abroad.

Europe is divided into 3 different zones:

Green zone = risk areas

Red zone = high risk areas

Black zone = areas under increased state of alert

DANISH-approved hauliers and vehicles are not allowed to drive direct to Danish herds, if they have been in black zones within the past seven days. The first 7 days after having finished cleaning and disinfection at one of the DANISH-approved cleaning and disinfection stations, they can drive to DANISH-approved collection centres only.

For DANISH-approved hauliers and their vehicles, that have **NOT** entered black zones within the past 7 days the ordinary state of alert in the DANISH Transport Standard applies.

3. Quarantine periods

1. Areas under increased alert

Below the affected areas are shown in tabular form. These will be changed in case of new outbreaks.

The different colour zones are shown in this map:

Countries without zone division:

Countries without zone division comprise countries with one zone colour only.

Green zone	Red zone	Black zone
Spain	Austria	Russia
Portugal	Croatia	Estonia
U.K.	Slovenia	Latvia
Ireland	Bosnia-Herzegovina	Lithuania
Sweden	Montenegro	Kaliningrad
Denmark	Kosovo	Belarus
Switzerland	Albania	Ukraine
Holland	Finland	Moldova
	Czech Republic	Slovakia
		Romania
		Hungary
		Serbia
		Bulgaria
		Macedonia
		Poland

Countries with zone division:

Countries with zone division comprise countries divided into two or three zone colours.

Green zones in divided countries are not included in the tables below.

Belgium

2. What determines the colour of a Washing Certificate?

All animal transports, which have been in areas under increased alert (black zones) within the past 7 days, will get a **black certificate** after cleaning and disinfection at a DANISH-approved cleaning and disinfecting station.

A total description of the four types of Washing Certificates which can be issued:

- A **black** Washing certificate is issued, if
 - a vehicle within the past 7 days before cleaning and disinfection has been in a “black zone”
 - “blanks” appear in the GPS-data.
 - the vehicle never sent any GPS-data.
- **Green** Washing certificate is issued, when GPS-data in the DANISH-Database evidence the vehicle has been in a green zone **ONLY** within the past 7 days.
- **Yellow** Washing certificate is issued, when GPS-data in the DANISH-database evidence that a vehicle has been soap washed within the past 4 hours. Besides GPS-data must evidence the vehicle has been in red and green zones **ONLY** within the past 7 days.
- **Read** Washing certificate is issued, when GPS-data in the DANISH-data evidence that a vehicle has been in red and green zones **ONLY** within the past 7 days.

ENGELSK	BLACK	RED	YELLOW	GREEN
Domestic transport <i>Transport of livestock between Danish herds</i>	Allowed after 7 days	Allowed after 48 hours	Allowed after 48 hours	Allowed after 48 hours
Domestic transport to collection station <i>Transport of livestock from a Danish herd to an approved collection station</i>	Allowed after 7 days	Allowed after 48 hours	Allowed after 48 hours	Allowed after wash and disinfection
Direct export <i>Transport of livestock from a Danish herd for export</i>	Allowed after 7 days	Allowed after 48 hours	Allowed after 12 hours	Allowed after wash and disinfection
Export from collection station <i>Transport of livestock from an approved collection station for export</i>	Allowed after wash and disinfection	Allowed after wash and disinfection	Allowed after wash and disinfection	Allowed after wash and disinfection

3. Quarantines

When moving animals between Danish herds a minimum of 48 hours of quarantine even at green and yellow certificates must be respected. During a period of increased alert there are three different standard Quarantines related to direct exports from DANISH-approved herds (collection centres excluded):

- 7 days --> (black Washing certificate)
- 48 hours --> (red Washing certificate)
- 12 hours --> (yellow Washing certificate)

Dynamic Quarantines

If a new Quarantine is obtained within an already imposed Quarantine, the total Quarantine will change and adapt to the new Quarantine, in case the new one is longer than the previous.

Case

Day 1

A vehicle has been in East-Poland (black zone).

Day 3

The vehicle is washed and disinfected in Denmark.

➔ Here it obtains a black certificate since it has been in black zone at day 1. The certificate states that the vehicle can load for domestic transport / direct export 7 days after cleaning and disinfection.

Equivalent to Day 10 after its return from East-Poland.

Within the Quarantine the vehicle goes to a collection centre in Denmark and does a transport to Germany plus some internal transports in Germany.

Day 7

(Since the vehicle was washed at day 3, there is still 3 days left of the quarantine at day 7).

The vehicle is washed and disinfected in Denmark again, since the vehicle returns after an export in Germany.

- Since the vehicle was washed within the quarantine period of the black certificate (no. 1., issued at day 3), the vehicle will obtain a black certificate again (no. 2)
- When the vehicle washes within a valid Quarantine, it will obtain the same colour of Washing Certificate as derives from the valid Quarantine. However, the Quarantine (time of permission to load) will have expired at the end of the first 7 days of Quarantine. This means the Washing Certificate (No. 2) will be black, whereas the Quarantine expires after 3 days (still on Day 10 after the vehicle has returned from East-Poland). The same applies when issuing red and yellow certificates.
